

prog-03 DELIBERATE EDGE CASES — annotations without /AP, and /AP that disagrees

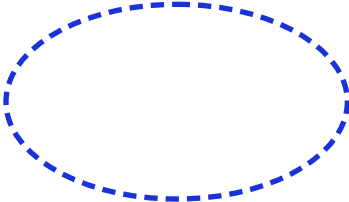

Top half: no appearance stream at all (viewer must synthesise). Bottom half: /AP and the geometry keys deliberately conflict.

SECTION A — NO APPEARANCE STREAM (all of these omit /AP entirely)

A1 Square, no /AP, 3pt red, IC pale red

A2 Circle, no /AP, 2pt blue dashed

A3 Ink, no /AP, /InkList only, 3pt green

A4 Line + arrow, no /AP

A5 Highlight, no /AP, QuadPoints only

A6 Sticky note, no /AP (icon must be synthesised)

Highlight me without an AP

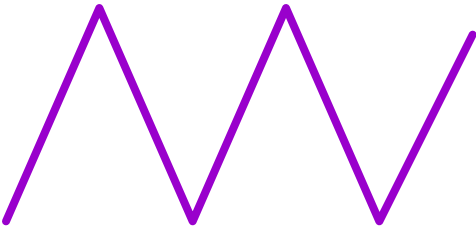

A7 FreeText, no /AP — /DA + /Contents only

A8 Polygon cloud, no /AP — /BE only

SECTION B — /AP DISAGREES WITH THE GEOMETRY KEYS. The appearance stream is the truth.

B1 Ink: /InkList says a straight diagonal; /AP draws a loop. A correct viewer shows the loop. B2 Square: /C says gold green fill; /AP draws an unfilled magenta outline. AP wins.

B3 Highlight: /C says red, /AP paints blue. AP wins.

C says red, the appearance stream says blue.

B4 Rect is BIGGER than the BBox content — the mark must not be stretched to fill /Rect.
